WINDOW CLOSING INSTRUCTIONS PRIOR TO TRAVEL

QR-152

WINDOWS

Purpose

This document outlines the correct procedure for closing all vented and egress windows that have crank or lever-style operators to avoid product damage during travel.

Procedure

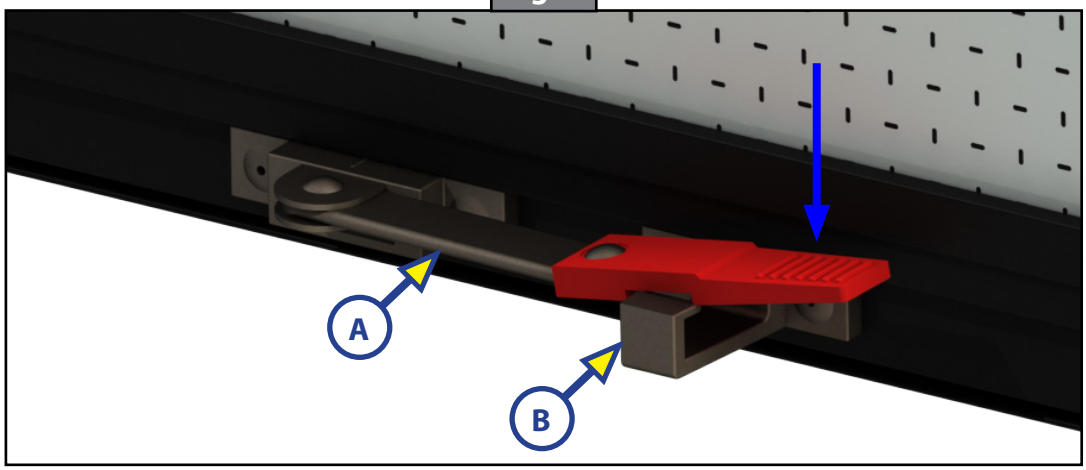

⚠WARNING

All windows should be fully closed prior to towing or moving motorized RVs to prevent product damage.

Lever-Style Operators

1. Straighten the lever and pull the window completely shut.
2. Push the lever (Fig. 1A) towards the latch (Fig. 1B) and then push the end of the lever down and into the latch until the end of the lever is held down by the lip on the latch.

Fig. 1

Knob-Style Operators

1. Turn the knob (Fig. 2A) counterclockwise until the window is flush to the frame.
2. Continue to turn the knob until it will no longer turn.
